MATHEMATICS OF THE USSR–SBORNIK

МАТЕМАТИЧЕСКИЙ СБОРНИК

Tom 102 (144) Nos. 1–4, 1977

Volume 31, Nos. 1–4 January–April, 1977 Pages 1–528

INDEX OF AUTHORS

Agračev, A. A. *A second-order necessary condition for optimality in the general nonlinear case* 493

Arsen'ev, A. A. *Construction of a turbulent measure for Vlasov's system of equations* 9

Belyĭ, V. I. *Conformal mappings and the approximation of analytic functions in domains with quasiconformal boundary* 289

Bondarenko, A. A. *On the classification of maximal arithmetic subgroups in split groups* 135

Citkin, A. I. *On admissible rules of intuitionistic propositional logic* 279

Drinfel'd, V. G. *Elliptic modules.* II 159

Drožžinov, Ju. N. and Zav'jalov, B. I. *Quasi-asymptotics of generalized functions and Tauberian theorems in the complex domain* 329

Frolov, N. N. *On the hypoellipticity of infinite-dimensional differential operators* 269

Gorbačuk, M. L. See Gorbačuk, V. I.

Gorbačuk, V. I. and Gorbačuk, M. L. *Boundary values of solutions of some classes of differential equations* 109

Gulisašvili, A. B., Rodin, V. A., Semenov, E. M. *Fourier coefficients of summable functions* 318

Henkin, G. M. *H. Lewy's equation and analysis on a pseudoconvex manifold.* II 63

Hol'kin, A. M. See Rofe-Beketov, F. S.

Hromov, A. P. *On generating functions of Volterra operators* 409

Ibragimov, N. H. and Mamontov, E. V. *On the Cauchy problem for the equation* $u_{tt} - u_{xx} - \Sigma_{i,j=1}^{n-1} a_{ij}(x-t)u_{y_iy_j} = 0$ 347

Koljada, V. I. *Imbedding theorems and inequalities in various metrics for best approximations* 171

Korobeĭnik, Ju. F. *Compound operator equations in generalized derivatives and their applications to Appell sequences* 425

Krasičkov-Ternovskiĭ, I. F. *An estimate for the subharmonic difference of subharmonic functions.* I 191

Kurčanov, P. F. *The zeta-function of elliptic curves over certain abelian extensions of imaginary quadratic fields* 49

Mamontov, E. V. See Ibragimov, N. H.

Mel'nikov, O. V. *The connected component of the group of automorphisms of a locally group* 219

Napalkov, V. V. *On solutions of equations of infinite order in the real domain* 445

Pavlov, B. S. *Selfadjoint dilation of the dissipative Schrödinger operator and its resolution in terms of eigenfunctions* 457

Poznjak, È. G. *Isometric embedding in* E^3 *of some noncompact domains in the Lobačevskiĭ plane* 1

Rodin, V. A. See Gulisašvili, A. B.

Rofe-Beketov, F. S. and Hol'kin, A. M. *On the connection between spectral and oscillation properties of the Sturm-Liouville matrix problem* 365

Safonov, M. V. *On the Dirichlet problem for Bellman's equation in a plane domain* 231

Semenov, E. M. See Gulisašvili, A. B.

Senatov, V. V. *On some properties of metrics on the set of distribution functions* 379

Skornjakov, L. A. *Commutative rings with subinjective ideals* 249

Sobolev, S. K. *On finite approximability of superintuitionistic logics* 257

Suslin, A. A. *On stably free modules* 479

Tihomirov, V. V. *On the Riesz means of expansions in eigenfunctions and associated functions of a nonselfadjoint ordinary differential operator* 29

Tkačenko, V. A. *On operators commuting with generalized differentiation in spaces of analytic functionals with given indicator of growth* 389

Vatutin, V. A. *Asymptotic behavior of the survial probability for a decomposable branching process with replacements depending on the age of the particles* 95

Višik, M. M. *The p-adic zeta-function of an imaginary quadratic field and the Leopoldt regulator* 151

Zav'jalov, B. I. See Drožžinov, Ju. N.

Zjuzin, Ju. V. *Irreducible separable polynomials with holomorphic coefficients on a certain class of complex spaces* 507
